

ICT and Women's Status in Iranian Society: a Sociological Perspective

Hossein Dehghan and Vida Rahiminezhad

Abstract

The paper focus on the emerging status of women's in Iranian society from sociological perspective with special emphasis on the role of ICT technology. More specifically, it examines the impact and role of tradition, educational participation and labour market on the status of women in Iranian society in context of the emerging opportunities and challenges thrown by the ICT technology. The paper suggests some measures in the context of ICT technology to bridge the gender divide in the society.

Key words: ICT, Women, society, gender divide.
